CAREER BACKGROUND

Full Stack Developer

Freelancer, June 2022 - Current

- Developed and maintained full-stack web applications using React/Redux for frontend development and Node.js for backend architecture.
- Contributed across the software development lifecycle, from requirements gathering and development through testing and production releases.
- Built and maintained API integrations to connect applications with external services and support business workflows.
- Managed application deployments and release workflows using Azure DevOps.
- Used Cloudflare Workers and cloud infrastructure to improve application performance and delivery.
- Collaborated with project managers and stakeholders to define requirements, prioritize features, troubleshoot issues and deliver project milestones.

Software Developer

Pharos Resources, June 2020 - June 2022

- Translated project specifications into software solutions focused on functionality, scalability and performance.
- Collaborated with development and testing teams to design and deliver robust solutions for client requirements.
- Worked with engineers to evaluate and improve software and hardware interfaces.

Junior WordPress Web Developer

Brighttail Digital, August 2020 - Feb 2021

- Built front-end websites using WordPress, HubSpot, HTML, JavaScript, AJAX and JSON.
  Worked with clients to identify site issues, clarify requirements and improve usability.
  Converted design mockups into functional web pages and supported ongoing website improvements.

Student Help Desk Technician

Hardin-Simmons University, Jan 2017 - Feb 2020

- Diagnosed and resolved hardware and software issues for users.
- Installed and updated software on Apple and Windows computers.
- Assisted users with operating system and workstation support.

ACADEMIC BACKGROUND

Hardin Simmons University

Bachelor of Science in Computer Science, 2016-2020
